EMBEDDED API > RESOURCES

Data retention

This API allows you to manage [data retention](#) periods in customer workspaces that have the Configurable Data Retention add-on enabled.

Quick reference

Type	Resource	Description
PUT	/api/managed_users/:managed_user_id/update_data_retention	Update a customer workspace's data retention period.

Update customer workspace's data retention period

Updates the data retention period for customer workspaces where the Configurable Data Retention add-on is enabled. Refer to the [Data retention policies](#) documentation for more information.

```
PUT /api/managed_users/:managed_user_id/update_data_retention
```

URL parameters

Name	Type	Description
managed_user_id	string <i>required</i>	Embedded customer workspace ID/external ID. The external ID must be URL encoded and prefixed with an <code>E</code> (for example, <code>EA2300</code>).

Payload

Name	Type	Description
data_retention_ttl_hours	integer <i>required</i>	The length of time to retain data for the specified customer workspace, in hours. The minimum data retention period is <code>1</code> hour and the maximum is determined by the Embedded customer's plan.

Sample request

```
curl -X PUT 'https://www.workato.com/api/managed_users/12345/update_data_retention' \
-H 'Authorization: Bearer <api_token>' \
-H 'Content-Type: application/json' \
-d '{
  "data_retention_ttl_hours": 720
}'
```

Response

```
{
  "data": []
}
```
